EXPERIENCE

MORSE Corp, Boston, MA - *Software Engineer*

September 2024 - Present

- Engineered simulation environment for reinforcement learning applications using C++ and Python, processing training data with PySpark and Pandas to support AI agent development.
- Architected Docker-based deployment environments and maintained GitLab CI/CD pipelines, streamlining builds, testing, and releases across maintained projects.
- Implemented comprehensive frameworks to test and evaluate various AI systems.

Self Employed, East Lansing, MI - *Full Stack Developer*

October 2018 - Present

- Developed and maintained web and mobile applications using Django, React Native, Umbraco CMS, PHP, JavaScript, and ASP.NET MVC 5.

MORSE Corp, Boston, MA - *Software Engineer Co-Op*

January 2023 - July 2023

- Utilized Python, PyCharm, PySpark, NumPy, and Pandas to maintain a testing and evaluation framework for AI models.
- Developed and implemented testable, maintainable, and extensible software designs.
- Collaborated with cross-functional software and design teams.

Morley Companies Inc, Saginaw, MI - *Junior Full Stack Developer*

July 2016 - December 2018

- Enforced best practices and implemented GitHub workflows and code reviews.
- Developed frontend for event registration systems using SCSS/CSS.
- Maintained and added functionality to company intranet using ASP.NET MVC 5.
